

FortiShield®

Total GI Tract Support

A combination of key functional components that support the gastrointestinal tract microbiome in ruminants and optimize feed utilization in the rumen.

- Supports immune system and gut health
- Aids in rumen fiber and starch digestibility
- Ideal for animals during periods of stress to support feed intake, nutrient absorption, and the immune system

FortiShield® Feed Additive consists of a carefully optimized blend of viable preparations of yeast culture, *Saccharomyces cerevisiae*, *Lactobacillus casei*, *Aspergillus oryzae*, *Enterococcus faecium*, *Bacillus subtilis* and *Lactobacillus lactis*. These functional ingredients are designed to support the total GI Tract, aiding in animal performance and production efficiency.
